

Information about Proxeed

Proxeed is a nutritional supplement that enhances sperm quality by providing nutrients that are necessary for sperm to mature.

We no longer recommend this supplement at the Michigan Center for Fertility & Women's Health. Instead, we prefer that our patients use *Sensual* to enhance sperm motility.

Sensual is an all-natural, safe, non-irritating and effective lubricant that makes love making a whole lot more fun. It is gentle enough to be used by those with skin sensitivities. Relieves vaginal dryness, is sperm-friendly and enhances fertility treatment. And because it is completely natural, it won't cause any burning or irritation.

An unpublished pilot study performed in 2014 showed *Sensual* preserved sperm motility, while other "sperm-friendly" lubricants showed some detrimental effects on motility.

A percentage of all sales of *Sensual* go to support *Seasons of Life Fertility Foundation*, (link to: <http://www.seasonsoflifefertilityfoundation.com>) a non-profit organization that helps couples struggling with infertility become parents.
