

Sensual by in Harmony is a 100% organic personal lubricant, making it completely safe to use during fertility treatment. Because it is completely natural, it will not cause burning or irritation. It is gentle enough to be used by those with skin sensitivities. It also relieves vaginal dryness.

An unpublished clinical study performed at Michigan Center for Fertility and Women's Health showed that *Sensual* preserved sperm motility, while some other "sperm-friendly" lubricants showed some detrimental effects on the motility.

Sensual can be purchased at any of our four locations or online at www.inharmonynaturals.com.
